

NSSL Mobile Mesonet and Soundings

- For more info: Sean.Waugh@noaa.gov
- All data has been archived and uploaded to the PERILS EOL
- MM data has been QC'd to include data flags indicating:
 - vehicle motion
 - logger over temperature
 - rapid acceleration
 - out-of-bounds sanity checks on all data values
- Sounding data has been QC'd to merge all data streams per flight as a single CSV file (also available in ASCII SHARPy formatted files)
 - Profile calculations are included at the beginning of the CSV files for reference
 - There are 34 soundings from 2022 and 53 from 2023
- Windsond data
